<b>History and Notes:</b>	<p>Caller states that she got Roundup splashed into one eye about 10 minutes ago. She has been rinsing her eye under the kitchen faucet for the past 10 minutes. Foreign body sensation reported. This is her good eye with 20-20 vision; she has limited vision in her other eye. Caller started to irrigate her eye but this caused a lot of discomfort. Caller is having a great deal of burning and stinging. MRPC discussed the product toxicity and referred the caller to an urgent care, ED or PMD. On follow-up, she stated she has gone to a doctor and was diagnosed with a burn to the cornea. Antibiotic eye drops and ointment prescribed. The MD told her that the long irrigation helped to minimize the corneal burn. Caller states that she irrigated for 20 minutes prior to calling.</p>
